- Git
- Azure CI/CD pipelines
- MSSQL
- REST APIs
- Working in an Agile environment

Projects

NBA Predictions App – 2022

- A full stack application that allows users to create their own NBA dream teams. Compare different teams to see which is more likely to win using the players efficiency rating.
- Built using Angular, .NET, SQL, Auth0, Azure.

EdAble Admin System – 2022

- Create and manage donation item campaigns that are listed on EdAble's main website. Display donation infographics and create reports.
- Built using Angular and Firebase services for data storage, image storage and authentication.
